Education

Georgia Institute of Technology

Atlanta, Georgia

B.S IN MATERIALS SCIENCE & MINOR IN COMPUTER SCIENCE

Aug. 2012 - December 2016

- 3.82/4.00
- Concentrations in Structural & Functional Materials, Artificial Intelligence

Experience

AMBER Lab - Dr. Aaron Ames

Atlanta, Georgia

AMPRO3 PROJECT MANAGER

Aug. 2015 - Now

- Manage a graduate team to implement novel nonlinear control algorithms on AMPRO3, a custom powered transfemoral prosthesis
- Design C++/ROS packages for transducer integration and trajectory generation

Intelligent Control Lab at Peking University - Dr. Qining Wang

Beijing, China

RESEARCH ASSISTANT

May 2015 - Jul. 2015

- Implemented USART communication and DMA memory management protocols in C for angular velocity sensors used in transtibial prostheses, increasing control loop resolution by 17%

SpaceX

Hawthorne, California

PROPULSION INTERN

May 2014 - Aug. 2014

- Optimized direct metal laser sintering algorithms for use with Inconel and Titanium superalloy powders in combustion component production, resulting in decreased porosity and expanded geometric capabilities
- Developed a complete metal powder characterization lab for use in DMLS initiatives and alloy microstructure analysis, saving \$150,000 per year in operation costs

Projects

FindED.io

Atlanta, Georgia

CO-FOUNDER

Jan. 2016

- Built a webapp which finds the optimal emergency room for non-ambulance emergencies from a database of 4,931 hospitals
- Returns search results based on real time travel data from Google Maps API, hospital quality metrics, and published wait time statistics

ReCap: Zirconia Recycling Initiative

Atlanta, Georgia

TEAM MEMBER

Jan. 2016 - May 2016

- Utilized materials testing methods to characterize swarf powder left over from the milling of zirconia dental crowns, resulting in a low-cost recycling solution for the reuse of 1.15 million pounds of zirconia annually
- Sponsored by 3M Corporation

Bandit: "Take What You Need"

Atlanta, Georgia

PROJECT MANAGER

Aug. 2015 - Dec. 2015

- Developed a modular data collection band which allows for unique loadouts of sensors based on user needs
- Implemented a prototype with hot-swappable sensors in C

Publications & Awards

Under Review **Robust Control of a Powered Transfemoral Prosthesis Device with Experimental Verification,** V. Azimi, T. Shu, H. Zhao, E. Ambrose, A. Ames, D. Simon *American Controls Conference 2017*

1st Place **FindED.io - A Patient Decision Tool for Determining the Optimal Emergency Room for Non-Ambulance Emergencies,** P. Taylor, T. Shu, F. Khan, D. Rivera, E. Lee *IJSE Paper Competition 2016*

1st Place **ReCap: Zirconia Recycling Initiative,** T. Shu, H. Liu, A. Thomas, H. Zhang, N. Kane, J. Wang *GT Capstone Expo 2016*

Jack J. and Leda Zbar Scholarship, Georgia Tech MSE Research Scholarship, Zell Miller Scholarship, TE Stribling Textile Fund, Art Cox Scholarship, Tau Beta Pi
